PRODUCT PROFILE

X900056 KUBOTA ICE PACK FILTER KIT

Replacement Filters for Sleeper Cab Air-Conditioning Systems

When it comes to keeping it cool - diesel powered truck sleeper cabin air-conditioning units rely on quality filtration to ensure driver comfort in all conditions.

In order to maintain quality cabin air-conditioning, the engines in these units need to be properly maintained. As a vital part of any proper engine maintenance program, filtration systems protect engines, minimise expected downtime and reduce engine noise - all while ensuring that critical cooling is maintained.

Donaldson filters meet or exceed OEM specification and are supported by a full manufacturers warranty, providing you with peace of mind for a deep and peaceful sleep for whatever truck you drive.

SPECIFICATIONS

Donaldson Part No: **X900056**

Applications: Ice Pack Filter Kit Kubota Model No: RK60NBE2
