FILTRATION SOLUTIONS

PRODUCT PROFILE

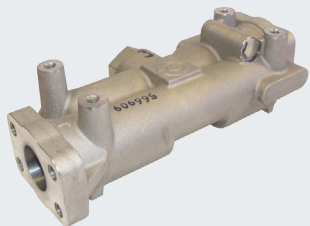

CLEAN FUEL AND LUBRICANT SOLUTIONS

Single pass filtration targeting an ISO cleanliness code of 14/13/11

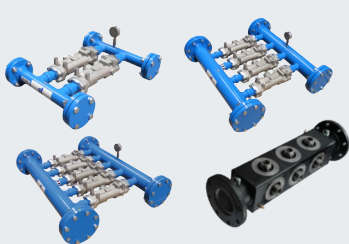

DESIGNED FOR USE WITH

Donaldson Clean Fuel and Lubricant Solutions Single Heads
P570329, P570330

Donaldson Clean Fuel and Lubricant Solutions Dual Head
P568583

Donaldson Clean Fuel and Lubricant Solutions Manifolds
P561880, P568932, P568933, DFF1012

Donaldson spin-on elements enable fast, simple and clean servicing, without the requirement of specialised tooling. The filter media has greater protection from contamination during service and installation than traditional cartridge style elements, further enhancing Donaldson's high initial efficiency.

Donaldson DBB5333 contains D.E.R.T. (Donaldson Electrostatic Reduction Technology) to minimise the effects of Electrostatic Discharge at high flow rates, ensuring your bulk fuel filtration provides the targeted ISO Cleanliness for the duration of its service life.

Spin-on elements capture your fuels contaminant within the replaceable can, eliminating the manual removal and cleaning of contamination usually required with fixed infrastructure. The DBB5333 spin-on elements can be configured for high flow rates with minimal pressure drop.

Part No.	Pack Qty	Specifications
DBB5333 replaces P575333	1	<p>Dimensions: O.D.: 117mm Length: 193mm</p> <p>Maximum working pressure 350 psi / 2413kPa / 24.1 bar</p> <p>Operating Temperature -40°C to 88°C</p> <p>< 4 Micron Beta 2000</p>
